CONTENTS OF VOLUME 77

Number 1

FOCUSSED ISSUE

Single-Molecule Biochemistry and Molecular Biology, Part II

Editorial
Single-molecule biochemistry coming of age
Leuba, S. and Zlatanova, J.

Single molecule measurements of titin elasticity
Wang, K., Forbes, J.G. and Jin, A.J. 1

Analysis of single-molecule mechanical recordings: application to acto-myosin interactions
Knight, A.E., Veigel, C., Chambers, C. and Molloy, J.E. 45

Structural and functional imaging with carbon nanotube AFM probes
Hafner, J.H., Cheung, C.-L., Woolley, A.T. and Lieber, C.M 73

Number 2

Review
The architecture of parallel β-helices and related folds
Jenkins, J. and Pickersgill, R. 111

Number 3

Review
Structure and function of the radical enzyme ribonucleotide reductase
Eklund, H., Uhlin, U., Färnegårdh, M., Logan, D.T. and Nordlund, P. 177

The function of Ca^{2+} channel subtypes in exocytotic secretion: new perspectives from synaptic and non-synaptic release
Fisher, T.E. and Bourque, C.W. 269
